FOR IMMEDIATE RELEASE

Didlake Inc. Upgrades Multi-Site Communications with Donated Telephony Equipment from TelNet of Virginia and Vertical

Manassas, VA, April 24, 2007 — TelNet of Virginia, Inc., and Vertical Communications (VRCC.OB) (“Vertical”), a leading provider of next-generation phone systems and voice applications that help businesses better serve their customers, today announced the donation of a telephone and voice mail system to Didlake, Inc., a non-profit organization that provides training, education and job placement assistance for people with disabilities. The enhanced telephony system has helped Didlake to reduce long distance costs and improve communications between its dispersed work locations and over 1,400 employees placed at Fortune 500 companies, small businesses and government agencies located throughout Virginia, Washington, DC and Maryland.

Vertical which donated the new digital telephone system, digital voice mail and assorted telephone handsets, established this community outreach program as a way to help 501c3 charitable organizations have access to the latest communication technologies. Marketplace success providing Vertical solutions to business enterprises enabled TelNet to join Vertical’s President’s Club Elite. Membership to this elite club allowed TelNet to nominate a local area charity to receive this one-time equipment donation. Installation and training services were donated by TelNet.

“The money we save from cutting long distance costs between our many service locations allows us to keep focused on our organizational mission, which is enriching the lives of people with disabilities within our community,” said Ivy Tetreault, IT Director for Didlake, Inc. “The new communications system TelNet and Vertical donated allows us to keep up-to-date in a highly competitive environment. We are now able to serve all our employees -- whether the individual is

handling administrative tasks sitting at a desk or walking throughout a location providing custodial services --on a single telephone system.”

Michael Howard, President of TelNet said, “We are honored to come together with Didlake to support their efforts to people with disabilities become contributing members of our community, to financially support themselves and boost self-esteem. As Didlake continues to expand its services through the Manassas/Prince William County business network, the new phone system will support the shift towards Internet technologies and handle anticipated future organizational growth.”
