

WEB CONFERENCING THAT MAKES SENSE Integrated with Zultys' award winning MXIE Unified Communications client

Outstanding Value for Your Business

The **MXmeeting™** appliance provides productivity and bottom-line boosting solutions in one unit:

- **Web conferencing** – sales presentations, product demos, interactive collaboration
- **Web seminar** – seminars for view only attendees with no client or agent to install. Viewable by any browser.
- **Webcam broadcast** – use your webcam as the presenter to broadcast video to viewers
- **Remote support & access** – remote access and support for PCs and Macs anywhere
- **Remote print and file sharing** – print documents remotely to anyone participating in a meeting session and easily transfer files

M200/M500

MXmeeting™

ALL BENEFITS, NO DRAWBACKS

Pays for itself in 4-6 months!

As compared to

Hosted Solutions

BENEFIT	DRAWBACK
Easy to deploy	Monthly fees*
No IT maintenance	Weak security
	No customization
	No integration

* System/Function subscription fees

Software Only

BENEFIT	DRAWBACK
On-premise security	Difficult to set up
No monthly fees	High up-front cost
	Ongoing maintenance

Integrated into the MXIE Toolbar:

MXmeeting™

Integrated webcam video broadcast

You own it, you control it!

MXmeeting™ is a web-conferencing platform that fully integrates with the Zultys MXIE Unified Communications client application. You can launch a multi-party web-conference with the touch of a button from your Mac or PC. The feature-rich MXmeeting appliance integrates into your network and allows attendees to join a collaborative web conference without even having special software installed on their computer. Click to start an interactive Web-Conference, seminar or remote desktop support with real-time webcam video...all with or without a free 150 port Voice Conference Bridge.*

You can brand the system and integrate it with your applications and websites. You can place "Host Meeting" and "Join Meeting" buttons on any external/internal web page, or windows based applications such as audio conference or CRM systems.

The appliance can be placed outside, behind or in the DMZ of your Router/Firewall.

Capacity Range:

MXmeeting Appliance	Included Capacity	Maximum Capacity
M200	2 Rooms, 10 Users	4 Rooms, 20 Users
M500	5 Rooms, 20 Users	20 Rooms, 100 Users
Note: General bandwidth requirements may vary depending on screen resolution, compressibility and use of video.**		

UNIVERSAL ATTENDANCE Anybody can join the meeting

The amazing Universal Attendance technology enables anyone with a modern browser, on any platform, to join a meeting. No download of any kind is required. The attendee is "view only" and can see the presenter's screen in a browser with similar speed as the fully interactive client attendee that requires a download.

Just think - no firewall, antivirus products, lockdown computers, or unsupported platforms can keep your key meeting participants from joining. And, it is fast - just 5 seconds to join. No more waiting 10 and 15 minutes to start your meeting while everyone works to get clients downloaded and connected.

- XP
- Vista 32/64 bit
- Windows 2000/2003
- Windows 7
- Windows Mobile
- Linux
- Unix
- Mac

MXmeeting™

Integration with MXIE client or stand-alone.
One click access. Easy, Intuitive, Accessible.

* This 150 port audio conference service is provided through a 3rd party at no additional charge to those purchasing MXmeeting and is only available in certain countries. Given the dependence on the 3rd Party, Zultys cannot guarantee the audio conference quality and / or availability. Check the Zultys website for coverage details. ** Use of MXmeeting with many external attendees requires upload bandwidth sufficient for that number of external attendees. E.g., five external attendees will require upload speeds of 400kbps-1000kbps at a minimum. Animation is not recommended for this application.
